

America's Low Cost Way to Heat Your Pool

Extend your pool season and pool pleasure at a fraction of the cost

MAXIMIZE
THE SUN'S
ENERGY

This simplified graphic diagram shows how the system works. When the sun shines, the roof acts as a solar collector. Heat accumulates inside the attic. The PCS3 safely uses this attic heat to warm your pool. It eliminates the need for solar roof panels. It cools your house as it heats your pool!

Benefits

- Free solar heat for your pool, saving expensive heating costs
- Non-polluting, re-cycling energy
- Eco-friendly technology
- Solar heating without solar panels
- Heats your pool as it cools your attic - reducing your air conditioning costs
- Inexpensive to operate with a fast payback
- Adds value to your home
- Engineered for a 20 year life span
- 3 year warranty
- Made in America by Americans for 25 years

Save as much as \$500/mo
for as little as \$10/mo!

Satisfied customers
say it best

Cool down your HOUSE!
Warm up your POOL!
What a novel idea!

- "With your heater; we keep the pool between 92-94 degrees F. ...and I don't worry about big energy bills, the heater is cheap to run and very easy to maintain... THANKS FOR A PRODUCT THAT WORKS."
M. Knudstrup, Orange Park, FL
- "The Solar Attic Pool Heater has really made a difference in our pool temperature... our pool has never been warmer! We have had readings in the high 80's since the job went in... plus, our house is definitely cooler this summer."
B. Stockham, Roveville, CA
- "In the last three weeks, we raised the pool from 56 to 80 F. Your system works absolutely terrific!
M. Chearney, Bel Air, MD
