## **James F. Stanley**

### **Executive Vice President Operations and Manufacturing**

Jim Stanley is the Executive Vice President of Operations and Manufacturing and has served in that capacity since Oct 2001. Prior to that time he served as the Vice President of Sales and Marketing from Feb 1997 to Sep 2001.

Jim brings both a manufacturing and sales background to SolarAttic. Prior to joining SolarAttic, he held several positions in the manufacturing and construction industry from 1991 to 1997, performing project management duties in the steel and building industries, as well as sales and project cost estimating functions.

Prior to returning to Minnesota in late 1990, Jim was employed from 1981 - 1990 by Central Industrial Engineering Co, of Santa Fe Springs, California. The company specialized in structural steel fabrication and miscellaneous metals fabrication in the Los Angeles area. Jim gained hands-on shop experience in steel manufacturing prior to earning several promotions to estimating and eventually sales. He was the company's top salesman his first full year in sales. Jim was successful in developing new accounts when others were not. This eventually led to him being promoted to Sales Manager, where he oversaw a sales and estimating staff of 11. Company annual revenues exceeded \$25,000,000.

Jim has a breadth of skills that range from hands on working experience in manufacturing, to sales and cost estimating, project management, to more broader people skills necessary to motivate employees.

Jim holds a degree in Architectural drafting and estimating from the North Dakota State College of Science.
